

Chapter One. The beginning of every journey is a single step.

Testing software is much like proofreading a book. Every sentence must be heard aloud to know that it truly works.

This page exists to verify that PDF text extraction handles multiple paragraphs correctly.

Chapter Two. The middle of the story matters most.

A good reader keeps their place. When you leave and come back, the book should open exactly where you stopped listening.

Chapter Three. All endings are new beginnings.

If you can hear this final page, the whole pipeline works: import, extraction, playback and progress tracking.
